

Managers Corner

November 9th, 2016

Dear Fountain View Lot Owners,

We have had a Lead and Copper water test results 2016, per Lee County Health Department. These results have been posted hallway to the pool, next to the mailboxes, in the hallway at the clubhouse, email blasted and posted on the website www.fountainviewrv.com. Any questions please inquire within the front office.

Thank you for your support.

Kind Regards,

A handwritten signature in black ink that reads "K.S. Kazor" followed by a horizontal line extending to the right.

Keith S. Kazor LCAM

Property Manager

PWS CERTIFICATION OF NOTIFICATION OF LEAD AND COPPER TAP SAMPLE RESULTS

INSTRUCTIONS: This form shall be completed and submitted by community or non-transient non-community water systems that take lead and copper tap samples in accordance with 40 CFR 141.86 (2009). Such systems shall, no later than 30 days after receiving each individual sample, provide notice of the individual tap results to the persons served by the water system at the specific sampling site(s) from which the sample(s) were taken, as required by 40 CFR 141.85(d) (2009). **NO LATER THAN THREE MONTHS FOLLOWING THE END OF THE MONITORING**, such systems shall also mail a sample copy of the consumers notification of tap results with this form, completed, to the appropriate Department of Environmental Protection District Office or Approved County Health Department. For systems that are on a reduced lead and copper monitoring period, the end of the lead and copper monitoring period is September 30th of the calendar year in which the sampling occurred. All information provided on this form shall be typed or printed in ink.

I. General Information		
Public Water System (PWS) Name: Fountain View WTP		
PWS Identification Number: 5364062	PWS Type: <input checked="" type="checkbox"/> Community <input type="checkbox"/> Non-Transient Non-Community	
PWS Size: <input checked="" type="checkbox"/> Small <input type="checkbox"/> Medium <input type="checkbox"/> Large		
PWS Owner: Fountain View Lot Association Inc.		
Contact Person: Keith Kazor	Contact Person's Title: Manager	
Contact Person's Mailing Address: 18961 North Tamiami Trail		
City: North Fort Myers	State: FL	Zip Code: 33917
Contact Person's Telephone Number: 239-877-5591	Contact Person's Fax Number: 239-731-5244	
Contact Person's E-Mail Address: keithkazor@towneproperties.com		
Date of the end of the Lead and Copper Monitoring Period: September 2016		

II. Certification

A. Certification by a Community Water System (CWS)

I am duly authorized to sign this form on behalf of the CWS. I certify that, no later than 30 days after the CWS received each individual lead and copper tap sample result during the monitoring period, from _____ to _____, the CWS notified each customer by mail, as required by 40 CFR 141.85(d) of the sample result.

_____ Signature and Date	_____ Printed or Typed Name	_____ Title
-----------------------------	--------------------------------	----------------

B. Certification by a Non-Transient Non-Community Water System (or a Community Water System Serving a Facility Where the Population Served Is Prevented from Making Plumbing Improvements and Is Not Separately Charged for Water Consumption)

I am duly authorized to sign this form on behalf of the PWS. I certify that, no later than 30 days after the PWS received each individual lead and copper tap sample result during the monitoring period, from 2015 to 2016, the PWS provided notice to consumers at sample taps tested, as required by 40 CFR 141.85(d). If the system posted the sample results in a public place or common area in the building(s) where the samples were taken, then check the box below.

The PWS posted the sample results in a public place or common area in the building(s) where the samples were taken, as required by 40 CFR 141.85(d).

<u>K.S.R.</u> Signature and Date	Keith Kazor Printed or Typed Name	Manager Title
-------------------------------------	--------------------------------------	------------------

* A community water system (CWS) shall complete the certification in Part II.A of this form unless the CWS is serving a facility (such as a prison or hospital) where the population served is prevented from making plumbing improvements and is *not* separately charged for water consumption, in which case the CWS may use the certification in Part II.B of this form. A non-transient non-community water system shall complete the certification in Part II.B of this form.

Consumer Notice of Tap Water Results

Dear Home Owners,

As you may know Fountain View is a public water system, because we are responsible for providing you with water at this location and ensuring that the drinking water we provide to you meets state and federal standards. The following table provides information on the tap location, date, and water sample result.

Drinking Water Sample for Lead		
Location	Date	Result (ppb)
Lot #52 La London Lane	9/29/16	0.0 mg/L
Lot #299 Blue Springs Terr.	9/29/16	0.0 mg/L
Lot #20 water plant	9/29/16	0.0 mg/L
Lot #130 Amide Drive	9/29/16	0.0 mg/L
Lot #258 Carmen Circle	9/29/16	0.0 mg/L
Lot #184 Carmen Circle	9/29/16	0.0 mg/L
Lot #13 Caravan Drive	9/29/16	1.0 mg/L
Lot #185 Ramble Drive	9/29/16	1.0 mg/L
Lot #207 Bojour Drive	9/29/16	1.0 mg/L
Lot #148 Clubhouse	9/29/16	35 mg/L

The 90th percentile value for our water system is below the lead action level of 15 parts per billion.

What Does This Mean?

Under the authority of the Safe Drinking Water Act, EPA set the action level for lead in drinking water at 15 ppb. This means utilities must ensure the water from the customer's tap does not exceed this level in at least 90 percent of the homes samples (90th percentile value). The action level is *the concentration of a contaminant which, if exceeded, triggers treatment or other requirements which a water system must follow*. If water from the tap exceeds this limit, then the utility must take certain steps to correct the problem. Because lead may pose serious health risks, the EPA set a Maximum Contaminant Level Goal (MCLG) of zero for lead. The MCLG is *the level of a contaminant in drinking water below which there is a no known or expected risk to health*. MCLGs allow for a margin of safety.

What Are The Health Effects of Lead?

Lead can cause serious health problems if too much enters the body from drinking water or other sources. It can cause damage to the brain and kidneys, and can interfere with the production of red

blood cells that can carry oxygen to all parts of your body. The greatest risk of lead exposure is to infants, young children, and pregnant women. Scientists have linked the effects of lead on the brain with lowered IQ in children. Adults with kidney problems and high blood pressure can be affected by low levels of lead more than healthy adults. Lead is stored in the bones, and it can be released later in life. During pregnancy, the child received lead from the mother's bones, which may affect brain development.

What Are The Sources of Lead?

The primary sources of lead exposure in most children are deteriorating lead-based paint, lead-contaminated dust, and lead-contaminated residential soil. Exposure to lead is a significant health concern, especially for young children and infants whose growing bodies tend to absorb more lead than

- **Run your water to flush out lead.** If water hasn't been used for several hours, run water for 15-30 seconds [or insert a different flushing time if your system has representative data indicating a different flushing time would better reduce lead exposure in your community and if the State approves the wording] or until it becomes cold or reaches a steady temperature before using it for drinking or cooking. This flushes lead-containing water from the pipes.
- **Use cold water for cooking and preparing baby formula.** Do not cook with or drink water from the hot water tap; lead dissolves more easily into hot water. Do not use water from the hot water tap to make baby formula
- **Do not boil water to remove lead.** Boiling water will not reduce lead. the average adult. Although your home's drinking water lead levels were below the action level, if you are concerned about lead exposure, parents should ask their health care providers about testing children for high levels of lead in the blood.

What can I Do To Reduced Exposure to Lead in Drinking Water?

For More Information

For more information on reducing lead exposure around your home and the health effect of lead, visit EPA's website at www.epa.gov/lead, call the National Lead Information Center at 800-424-LEAD, or contact your health care provider.
